

BILISUMA ERESSO

Full-Stack Software Engineer | Web • Mobile • Product Development
Addis Ababa, Ethiopia | +251 938 730 818 | bilisumaere@gmail.com
[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Information Systems student and full-stack software engineer focused on building products across web, mobile, and backend systems. Experienced in designing and shipping full-stack applications using React, React Native, Node.js, Express, and modern databases across personal, startup, and client projects. Strong interest in product development, startup execution, and scalable software, with hands-on experience taking ideas from concept to deployment.

EDUCATION

Addis Ababa University — B.Sc. Information Systems
Relevant Coursework: Data Structures & Algorithms, OOP, Database Systems, Operating Systems, Computer Networks, System Design

Expected June 2027

TECHNICAL SKILLS

Languages

JavaScript (ES6+), TypeScript, Python, SQL

Mobile

React Native, Expo (iOS & Android)

Databases

MongoDB, PostgreSQL, Supabase,

Tools & Design

Git, GitHub Actions, Postman, Figma, VS Code

Web Frontend

React, TailwindCSS, HTML5/CSS3

Backend

Node.js, Express.js, REST APIs, JWT Auth, WebSockets, Telegraf

Cloud & DevOps

Docker, Vercel, Cloudinary

Spoken Languages

Amharic (native), Afan Oromo (native), English (professional)

STARTUP

Founder & Product Engineer — OmishGO
Agriculture e-commerce platform (launching soon)

2025 – Present

- Designing and building an agriculture-focused e-commerce platform connecting stakeholders through digital commerce and service access.
- Leading end-to-end product development across frontend, backend, mobile, and deployment infrastructure as sole technical founder.
- Building scalable systems using modern web and mobile technologies while managing product direction, technical architecture, and go-to-market execution.
- Conducting iterative product validation and feature planning focused on real user needs within the agriculture sector.

PROJECT EXPERIENCE

EduLingua — AI-Powered East African Language Learning App [FrontEnd](#) | [BackEnd](#) 2025 – Present

React Native · Expo · Node.js · Express · MongoDB · PostgreSQL · Supabase · JWT · Cloudinary

- Built a cross-platform language learning app for East African languages featuring AI-assisted exercises, pronunciation support, and progress tracking.
- Developed backend systems for authentication, lesson delivery, streak tracking, and user progress persistence using Node.js, Express, and MongoDB.
- Designed mobile-first learning experiences with offline-ready lessons and optimized React Native performance.

E-Commerce Platform [Repo](#)

Aug 2025 – Dec 2025

React · Node.js · Express · MongoDB · Stripe API · JWT · Cloudinary

- Built a full-stack e-commerce platform with JWT authentication, role-based admin management, and protected REST APIs.
- Integrated Stripe payment processing with webhook handling and secure server-side transaction validation.
- Improved performance through query optimization, image handling, lazy loading, and modular frontend architecture.

Technical Blog Platform [Repo](#)

May 2025 – Jul 2025

React · Node.js · Express · MongoDB · RBAC · JWT · Cloudinary

- Built a developer-focused blogging platform with role-based access control for authors, editors, and administrators.
- Designed modular backend services and REST APIs to improve maintainability and feature organization.
- Integrated media upload and optimization workflows using Cloudinary and deployed through modern CI/CD workflows.

StudyHub — Telegram Bot for Student Resources [Repo](#)

2025

Node.js · Telegraf · MongoDB · Cron Jobs · File Archive System

- Built a Telegram bot for students to search, upload, and access educational resources including notes, textbooks, and past exams.
- Implemented indexed search and automated content organization for faster resource discovery.
- Supported a growing student community through scheduled digests, persistent storage, and scalable bot workflows.

CLIENT WORK

Delivered software solutions for private clients across web and mobile platforms.

- Built and delivered a custom business website and CMS platform for a construction company, including admin content management, media uploads, and responsive UI.
- Developed a React Native mobile application prototype for a private client, handling UI implementation, functionality, and deployment for testing.
- Contributed backend API integration and database improvements for an existing client web platform, adding new endpoints and improving data handling workflows.

Experienced shipping products independently across startup, personal, and client projects, with strong interest in building software for East African markets.
