SUMMARY

Full-Stack Developer specializing in MERN stack applications with experience building scalable web platforms, secure authentication systems, and REST APIs. Strong foundation in backend architecture and modern React development, focused on performance and production-ready software.

EDUCATION

Addis Ababa University — Bachelor of Science in Information Systems

Expected Graduation: June 2027

GPA: 3.79 / 4.0

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, C++, SQL

Frontend: React, TailwindCSS, Framer Motion, Three.js

Backend: Node.js, Express.js, REST API Design, JWT Authentication

Databases: MongoDB, SQL Server

Tools & Platforms: Git, Postman, Vercel, Cloudinary

Core Concepts: Data Structures & Algorithms, OOP, System Design, API Architecture

PROJECT EXPERIENCE

E-Commerce Platform (MERN Stack) — MongoDB • Express • React • Node.js • Stripe API | Aug 2025 – Dec 2025

- Architected a full-stack e-commerce application with JWT authentication and protected REST APIs.
- Integrated secure payments using Stripe API with server-side validation.
- Built scalable backend services and admin dashboard for product and order management.

Technical Blog Platform (MERN Stack) — RBAC • Cloud Media Management | May 2025 – July 2025

- Developed a developer blogging platform with role-based access control and secure content workflows.
- Designed modular REST APIs and integrated cloud media storage via Cloudinary.
- Deployed responsive production-ready application.

Personal Portfolio Website — React • Framer Motion • TailwindCSS | Jan 2026 – Present

- Built interactive portfolio with animated UI and responsive design.
- Optimized performance and implemented reusable component architecture.

RE-Construction Portfolio Platform — MERN Stack • MongoDB • Express.js | Jan 2025 – Apr 2025

- Created business portfolio platform with custom backend APIs and structured MongoDB schemas.
- Applied Agile workflow and Git-based version control.

ENGINEERING HIGHLIGHTS

- Designed multiple full-stack applications using modern JavaScript ecosystem.
- Implemented secure authentication systems using JWT and role-based authorization.
- Built scalable REST APIs following modular backend architecture principles.
- Experience deploying and maintaining cloud-hosted web applications.

ADDITIONAL INFORMATION

- Strong interest in scalable backend systems and modern web architecture.
- Active independent developer building real-world full-stack applications.
- Continuously learning advanced system design and performance optimization techniques.
